Governor Tiliman is right on the sub-treas ury scheme, and we presume that a majority of the Alliacemen who do not wear collars will see the collossal humburg as he does. Of course the lecturers and officers of the Alliance have no discretion in a political party which wipes out individual opinion, and forces its members to wear the collars which are prepared for them at St. Louis, Mo., or Ocala, Florida, and who are obliged to utter the sentiments to which they may not hold, or else be kicked out. We pity the officer and the lecturer who must shut his mouth and swallow everything that is mouth and swallow everything that is thrown inte it, and is then compelled to go off and say he loyes it and endorses it. ## Good Advertising Medium.

Twenty-one of the best summer resorts are advertised in the News and Courier, being perhaps a larger number of advertisements of this kind than ever went into any Southern newspaper at one time. The News and Courier is first class in every respect, and it has a support in South Carolina which fully warrants the liberal advertising which is accorded to it. When a citizen reads the News and Courier he knows all the news, and in each paper there is something "to read."

Somehow Governor Tillman does not seem Somehow Governor Tillman does not seem to be pushing his investigations into the extent of the phosphate deposit in Coosaw territory. It is just as well perhaps, for the Governor knows, at the present rate it is not likely to be exhausted soon. The question that bothers the Governor just now is how long the people can stand the loss of \$2,000 per week without kicking.—Spartanburg Herald.

If we were to make a prediction, we would say, if the present Legislature at the next sitting does not make some proper disposition of the Coosaw question, that the Coosaw will be the question upon which the members of the next General Assembly will be elected. As opposed to the present idiotic plan of stopping the work, the Press and Banner would vote for Shack's Charley in preference to any man who would attempt to uphold the cutting off of \$2,000 a week revenue. Even blind Tillmanites ought to see the folly of the present course.

There is another volume of literature of the treatment of convicts. We are not cer tain that many politicians care how the con victs are treated. That matter may come up in the next campaign, if it wants to.

THE C. K. & W. road is to be finished from Greenville to Marietta-three miles of which remain unflinished.

The secret is out. It is now reported that work on the Cumberland Gap road has been stopped, and it is probable that no more work will be done on it this year.

We hear it suggested that the railroad authorities are waiting to see what disposition will be made of the C. K. & W. road, which is now in the hands of a receiver. If it

The Press and Banner has changed its mind on the factory question, and would now suggest that the town vote five per cent of our property to the capital stock of a cotton factory. A factory would be of substantial and lasting material benefit to the town, and the capital stock would have a money value, from which a reasonable dividend could be realized.

If we can't agree to build a factory, then let us vote a tax to build one or two good school houses. A public school for the white people and a similar one for the colored children, would be of everlasting benefit.

He expressed his pleasure at being present at these interesting exercises of the school and commended the teacher and pupils for the interest they manifested in the cause of education. He said that he felt a personal interest in the welfare of that community, that only a few miles from that spot his father was born and received his primary education. He spoke of the power of sympathy and the importance of cultivating a warm, generous disposition. The day was warm and the demand for water was frequent. Leaving the school house in the afternoon, we had not gone a great distance before we came to a nice new dwelling house on the side of the road. The well not being enclosed everybody and the horses stopped for a drink. The well here, as at Mr. S. E. Price's, was nicely fixed, and had a horse trough too. The home-folk were away, but we stopped all the same, and got all the water that folk and horses could drink. Upon enquiring, we learned that this place is the home of Mr. B. F. Price, who, we presume, from the home and the similarity of the good well-fixtures, is a brother of Mr. S. E. Price, from whose well the school house people draw water.

Elberton Gazette.

On Thursday morning last we took the train on the G., C. & N. railroad for a sbort ride in the way of recreation, and to see something of the new railroad. We had expected to find it a little rough, being new, but were most agreeably disappointed in finding it one of the smoothest and most pleasant roads we were ever on. Of course, the track had some little bumps in it, but the springs to the coaches were so elastic that there was no joiling or jarring, and the effect was more pleasant than otherwise.

In a very short time we were at the first station below Elberton, called Middleton. Here we found a neat and comfortable depot, and preparations being made for the erection of other buildings, both residences and business houses. Dr. N. G. Long and Mr. L. H. O. Martin have a brickyard there aiready in operation, where they expect to make brick storyth to emply that place, as well as to

makes us love our fellow man better to come in contact with such men as Mr. Wilson, even if he is a buchelor.

We also had the pleasure of meeting and enjoying the the society of Gen. Hemphill, editor and proprietor of "The Medium." He is a very pleasant, cultivated and entertaining gentleman. Abbeville has two of the best newspapers in the State, and they are edited by two as clever men as could be found even in Georgia. One proof of this is that they work side by side as harmoniously as two loving brothers.

Abbeville is one of the oldest towns in South Carolina, and in ante bellum days, was one of the wealthiest towns and counties in the State. The town is not on as much of a boom as some places, but enjoys a good, healthy growth, which is substantial and lasting. We believe that the building of the G., C. & N. Raliroad will do great things for that town and county in developing a large area of lands on the other side of the Savannah river which have been lying almost dormantsince the aboiltion of slavery. These lands are owned in large tracts, and if the owners will cut them up and put them upon the market in small tracts, we believe they will find purchasers at good prices who will make them praductive and profitable.

We would like to say more concerning our trip, and what we saw and heard and think, but must hold up for the present.
